

MOSAIC

Mix and match of the COVID-19 vaccines for
SAfety and ImmunogenCity

The Children's Hospital Research Institute of Manitoba is seeking volunteers to participate in a COVID-19 vaccine clinical trial

WHY IS THIS STUDY BEING DONE?

MOSAIC is evaluating third doses of COVID-19 vaccines (booster shots) for vaccines authorized for use in public health programs in Canada. This study will look at how effective different three-dose combinations of COVID-19 vaccines are, and how long the protection for each combination lasts.

AM I ABLE TO SIGN UP?

You may be able to participate in this study if you are:

- 30+ years old and in good health
- not pregnant and do not plan to become pregnant
and
- have received your second COVID-19 vaccine at least 5 months or more before your first study visit

WHAT WOULD I HAVE TO DO?

You will have 4 clinic visits and 1 telephone/email contact during a 12-month period. The total time commitment is approximately 2-3 hours.

If you are interested in participating or
have questions, please contact:
