Medical Lead of the Research Support Unit, CHRIM

Summary:

Provides medical leadership to the Research Support Unit (RSU) at the Children's Hospital Research Institute of Manitoba (CHRIM). Acts as liaison between clinical staff within the Winnipeg Children's Hospital and CHRIM to support and grow clinical research.

Duties and Responsibilities

- Provides clinical leadership to the RSU team in terms of medical policies and procedures
- Provides input to the Scientific Director (SD)/ Chief Executive Officer (CEO) of CHRIM on issues of operations of the RSU including strategic planning, finances, human resources, facility management and business development of the RSU
- Engages the clinical research community to identify research support needs and opportunities for the RSU to support clinical research projects.
- Provides strategic advice and input regarding the performance, effectiveness, and continuous improvement of the RSU
- Promotes clinical research within the Children's Hospital
- In collaboration with RSU Trial Managers, interfaces with RITHIM stakeholders
- Provides leadership to promote excellence in clinical research activities within the RSU.
- Develops a vision, generates plans, implements changes and resolves issues in collaboration with the SD/CEO
- Contributes to and promotes the mission of CHRIM
- Is the responsible Principal Investigator listed on the RSU UM Biosafety permit for Lab 547A & clinic rooms on the 5th floor.

Qualifications

Board- certified pediatrician or pediatric subspecialist

Past experience in clinical trials and/or clinical research involving pediatric participants

Member of CHRIM

Time Commitment and Compensation:

- The position requires an estimated commitment of **one day per week**, subject to annual review based on the operational needs and growth of the Research Support Unit.
- A stipend will be provided in recognition of the leadership and administrative responsibilities associated with this role. The stipend will be reviewed periodically and approved in accordance with CHRIM's compensation governance practices.
